**Description**

The space-saving Sliding Plate PFS Palletizer provides all the advantages of a fully automatic system to companies with low capacity requirements. It can accommodate any bag pattern. Each PFS palletizer is composed of independent modules, enabling it to be configured to fit virtually any space requirement. Peripheral equipment can easily be added.

**Features**

- Low infeed height (36" from the floor) for easy monitoring
- Pop-up turning device with variable frequency drive
- Counterweighted slide plate elevator with high capacity variable frequency drive
- Timing belts and timing pulleys everywhere possible
- Standard empty pallet magazine

**Optional accessories**

- Bag flatteners
- Bag marking systems
- Slip sheet dispensers
- Top sheet dispensers
- Automatic glue systems
- Metal detectors
- Automatic "In-Motion" checkweighers

**Technical specifications**

- PLC operation including modem
- Touch screen operator interface
- Full diagnostics
- Capacity, up to 15 bags/minute (900 bags/hour)

**Complete Systems from One Source**

Mollers North America also offers Valve Bag Packers and Placers, Conventional and Robotic Palletizing Options and Stretch-Hooding and Shrinkwrapping Systems for load protection and unitization.

**Pack**

Automatic placement and filling of valve bags

**Palletize**

Automatic palletizing of up to 3,000 bags per hour

**Protect**

5-sided protection with superior load unitization
